## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 7, 8, 11-32 and 58-67 are allowed.

The following is an examiner's statement of reasons for allowance. In forming an array, the prior art teaches curing or drying of compounds used for immobilizing a material, or functionalization, and then contacting the substrate with the material to be immobilized, and such curing appears to be typical in the prior art. (As to the Brennan reference, it is not clear that the silane is not cured. Brennan's reference to the silane as having a surface tension does not necessarily mean that the silane is in liquid form since the art refers to silane that is cured as having a surface tension, see cited art below.)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 20020076832 discloses curing of silane before an immobilization step. 4,308,799 refers to cross-linking agents such as silanes which on curing affords a cured article having a particular critical surface tension.
